MATT HIRSCHBECK OBTAINS PROFESSIONAL ENGINEER LICENCE

LAKWOOD, COLORADO – Richard P. Arber Associates is proud to announce that Matt Hirschbeck has obtained his professional engineering license from the State of Colorado. “The enthusiasm and determination that Matt has shown through his professional career is reflected in the work he has completed here at Arber,” Rick Arber said, “We are proud of his advancement to a licensed professional engineer.”

Matt has over five years of experience in design of water treatment and distribution systems and wastewater treatment and collection systems. Matt received his Bachelor of Science in Civil Engineering from Bucknell University, and his Master of Science in Environmental Engineering from Yale University. Matt is currently working on the Town of Frisco membrane filtration water treatment plant and assisting with office services during the construction of the City of Alamosa’s \$10 million membrane water plant for removal of arsenic.

“My experience with design of the Frisco and Alamosa membrane treatment plants has provided me with a strong foundation in design engineering that will enable me to handle the responsibilities and challenges ahead.” Matt said.

Founded in 1981, Arber Associates is a professional consulting engineering firm serving municipal, special district, and federal clients. The employee-owned firm provides planning, design, construction administration, and alternative project delivery services for water, wastewater and water reuse treatment systems. For more information regarding Arber Associates please contact Steve Ravel at 303-831-4700 or steve@arber.com.
